

Technical fluids - Powersteering

Eurol LHM+ Fluid

Especially for brake, suspension and power steering systems of Citroën

Description

Eurol LHM+ Fluid is a mineral fluid, especially developed for brake, suspension and power steering systems of particularly Citroën. Eurol LHM+ Fluid cannot be mixed with 'DOT' brake fluids.

Eurol LHM+ Fluid has a very high viscosity index. As a result, the viscosity hardly changes under influence of temperature fluctuations.

Eurol LHM+ Fluid protects the system against oxidation. Because of the high boiling point and the water resistance, the product can be applied for a long lasting and safe use when this type of fluid is prescribed.

Performance level

- PSA B71 2710 (LHM Plus)

Physical properties

Colour	Green	
Density at 20°C	0.84 kg/l	ASTM D 4052
Viscosity, kinematic at 40°C	18.8 cSt	ASTM D 445
Viscosity, kinematic at 100°C	6.2 cSt	ASTM D 445
Flash point	110 °C	ASTM D 93
Pour point	-36 °C	ASTM D 97
