

Eurol Coolant -36°C RND

Silicate-free long life coolant for Renault-Nissan-Dacia

Description

Eurol Coolant -36°C RND has especially been developed for the cooling systems according to modern engine requirements of the Renault-Nissan-Dacia car manufacturers.

Eurol Coolant -36°C RND is an ethylene glycol based coolant that provides long-life corrosion protection by the use of special corrosion inhibitors for all engine metals, including aluminum and ferrous alloys.

Eurol Coolant -36°C RND prevents from scale formation, foambuilding, sludge formation and leakage. The product does not affect rubber, plastics, metals, aluminum or its alloys.

Eurol Coolant -36°C RND can be used in engines manufactured from cast iron, aluminum or combinations of the two metals, and in cooling systems made of aluminum or copper alloys.

Eurol Coolant -36°C RND provides a permanent, guaranteed protection against freezing up to -36 °C and has to be used undiluted. Never top-up with water.

Eurol Coolant -36°C RND is silicates and phosphates free.

Eurol Coolant -36°C RND is compatible with most other coolants based on ethylene glycol. However, an exclusive use of Eurol Coolant -36°C RND, is strongly recommended for optimum corrosion protection and sludge control.

Eurol Coolant -36°C RND can also be used for MB 326.7 or antifreeze 325.7 applications.

Performance level

- Renault-Nissan-Dacia, Infiniti, Samsung, Datsun, Lada/Avtovaz

Physical properties

Colour	Yellow	
Density at 20°C	1.06 kg/l	ASTM D 4052
Pour point	-36 °C	ASTM D 97
Frost protection	-36 °C	ASTM D 1177

Article number E504012
Version 1.1, 08-04-2020
